

# About This DVD

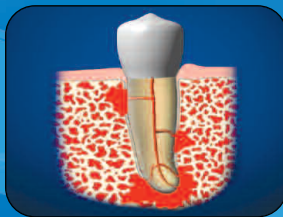

The purpose of this video is to powerfully demonstrate endodontic treatment techniques you can utilize to consistently shape canals and three-dimensionally clean and fill root canal systems.

Techniques are demonstrated utilizing 3-D graphics and animations, extracted teeth and operatory patients. All procedures have been performed to optimally transfer knowledge and maximize your learning experience.

Creating Endodontic Success

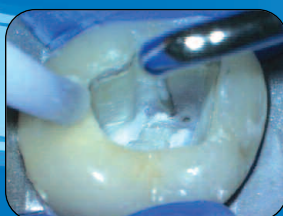

## Rationale for Treatment

Appreciate how pulpal breakdown, disease flow and root canal systems impact the restorative practice.

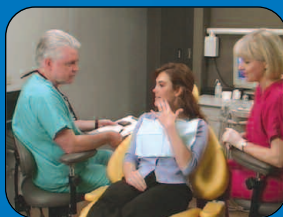

## Patient Diagnosis

Learn the 3-step endo exam, how to identify pulpally involved teeth, and find the "pot of gold".

## Access Preparation

Achieve complete, straightline access to all orifices and create the opening for canal preparation.

## Concepts & Strategies

Learn how to sequence the preparation, establish working length, and consistently manage the glide path.

## Shaping & Cleaning

RUDDLE ON ROTARY techniques allow you to safely and efficiently shape canals with emphasis on internal and external anatomy.

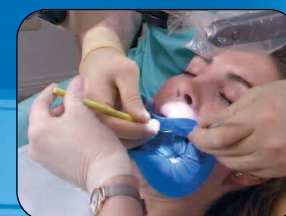

## Hydrodynamic Disinfection

Visualize how fluid activation encourages debridement and disinfection. Cleaning root canal systems promotes 3-D obturation.

## 3-D Obturation

Step-by-step techniques demonstrate how to predictably fill root canal systems using warm gutta percha methods.

## Coronal Restoration

Appreciate the importance of achieving the "rest of the seal" and how to properly finish successful endodontic treatment.

Directed and Produced by Studio 2050  
Approximate Running Time: 185 minutes

## Clifford J. Ruddle DDS FACD FICD

*Dr. Ruddle is Founder and Director of Advanced Endodontics and the Director of Endodontics at the Scottsdale Center for Dentistry. Additionally, he maintains teaching positions at various dental schools, is a Fellow in both the American and International Colleges of Dentistry, and has authored numerous articles and chapters for leading textbooks. As an inventor, Dr. Ruddle has designed and developed several instruments and devices that are widely used internationally. He is best known for providing superb education through his lectures, instructional DVDs, and "ONE-ON-ONE" training courses in Santa Barbara, California.*
